

SANPLAST.
Pure Pleasure

**Sanplast - We create Pure Pleasure of bathing
in each bathroom area**

Colored shower tray? why not?

Sanplast SA shower trays are reliable solutions for each bathroom. They have been made with attention to detail, in modern technology, as well as from durable, safe materials.

White in the bathroom equipment is a timeless color. It blends well with various colors that define the design of the room, and at the same time looks aesthetically and hygienically. However, choosing other colors such as shades of gray or black is a solution for everyone who wants their bathroom to look special. The combination of the original design with one of the seven available colors of the shower tray allows you to achieve great results. Creating a bathroom with a unique atmosphere has never been easier.

The advantage of Space Mineral, Open Mineral, Space Line and Prestige series shower trays is the possibility of using the Pro Safe System surface in them. This innovative, non-slip surface is applied to the surface of the mineral cast. The transparent pattern created in this way with a delicate structure permanently increases the safety of using the shower tray.

The non-slip surface is flat and durable, so you do not have to worry about both its appearance and abrasion. This is very important for every user.

Structure Mineral and Open Structure Mineral shower trays have a structured surface with non-slip properties. All shower trays made of mineral cast are very pleasant to the touch, but also resistant to various types of stains and discoloration and abrasion.
